

National Vision Administrators, L.L.C.

Discover why NVA is an industry leader in vision benefits for Union Health & Welfare Funds.

Meeting the Needs of Labor Groups for Nearly 40 Years

NVA is a national vision benefits company with nearly 40 years experience providing customized vision programs to Union Health & Welfare Funds. Today labor unions face unique benefit challenges that NVA is particularly well suited to address.

We will save you money while duplicating or enhancing your existing vision benefit. Your members will have access to approximately 60,000 vision care combinations, of all types, in all locations, across America. NVA's national scope affords you the ability to deliver a replacement benefit that will reduce your costs and keep your members happy.

Cost-Effective Vision Programs

In an industry with many divided loyalties, NVA works for our clients. NVA does not own retail optical outlets, optical labs, or frame and lens manufacturers. We succeed when you spend less money, not more.

NVA uses its size to negotiate aggressive network discounts and its independence to focus on provider management to lower Fund costs. Your members' out-of-pocket expenses will also be reduced by features such as fixed pricing on lens options.

Service That Never Sleeps

Your members need answers. Regardless of the time of day or the day of the year, NVA representatives are available, in-person, to assist and serve your members. The world doesn't work only when the sun shines and neither do we. 24/7/365 - We are here to help whenever you and your members need us.

Integration of Vision Plan with an Overall Healthcare Philosophy

A vision benefit should include more than contact lenses and fashion frames. A comprehensive eye exam is a valuable component of any Wellness program and a path to early detection of many serious conditions such as Diabetes, Hypertension, eye diseases and drug-induced ocular side effects. Using the information found from a comprehensive eye exam, NVA presents an action oriented set of programs that focus on reducing medical issues and healthcare costs for both you and your members.

Get a better view.

You deserve a better view. Let NVA help you get it. Contact your NVA representative today.
