

2019 Precision Quick Reference Formulary

The Precision Quick Reference Formulary is intended to provide a list of commonly prescribed drugs that are covered. This is not an all-inclusive list, the formulary covers many more drugs. On the Quick Reference, generic drugs are listed in lower case and brand drugs are listed in CAPS. Remember, if a generic drug from the formulary is prescribed, the copay may be less than if a brand drug is prescribed. If the drug has step therapy or prior authorization on the formulary at the time of publishing, it is indicated below with a star (*). There are other safety edits that are not listed because of the abbreviated nature of this document. Individual plan designs may also change coverage of products listed. To see the complete listing of covered products please visit cap-rx.com.

Most Commonly Prescribed Medications

Drugs are listed alphabetically

acetaminophen-codeine	CLIMARA PRO	HUMALOG JR	metformin hcl	PREMPRO	tamsulosin hcl
acyclovir	clonazepam	HUMALOG KWIK	metformin hcl er	PROAIR HFA	testosterone cypionate
